

EU-Funded Project

EBSI-NE

The EBSI Node Expansion (EBSI-NE) project is a key part of Europe's digital evolution, focusing on expanding the European Blockchain Services Infrastructure (EBSI). This initiative aims to strengthen EBSI by adding 18 new validator nodes, increasing its capacity and robustness. This move is a significant step in enhancing Europe's blockchain technology, driving its adoption across the continent. EBSI-NE offers specialized support services for all stakeholders, positioning Europe as a leader in blockchain innovation and contributing to a more connected, secure, and technologically advanced digital landscape in Europe.

GOALS

Increase validator nodes adding 18 validator nodes to enhance EBSI's robustness and maturity.

Enhance the nodes with ISO 27001 certification, tailored tests and EBSI nodes as trusted e-ledgers for eIDAS2.

Provide essential support services to EBSI stakeholders

Strengthen infrastructure for greater resilience and security

PARTNERSHIP

24 partners from 14 countries

European Blockchain Services Infrastructure (EBSI Website)
